Jon Peterson, EPA Project Coordinator
USEPA
Region V
77 W. Jackson Blvd.
Chicago, IL 60604

Dear Mr. Peterson:

On November 2, 1999 a final inspection was made at the Albion-Sheridan Township Landfill Superfund site. The attached letter from our consultants, Hull & Associates, Inc., documents the issues and concerns that existed the day of the inspection.

In some cases there was agreement to repair or address the concerns that were raised. In other instances, particularly dealing with erosion, there was a desire to wait and see if the problem persisted in the spring/summer after the vegetation took hold.

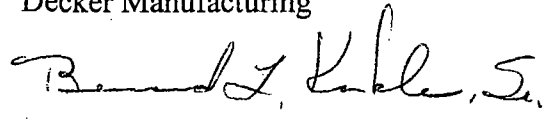

These items can be addressed under the warranty period if they continue to be a problem in the spring/summer; however, we did want to document with USEPA the areas of concern raised by our consultant. If you have any questions with the issues raised, please let us know, otherwise we will reevaluate these issues in the spring/summer to see if additional action is needed.

Sincerely,

City of Albion

Michael S. Herman, City Manager
